CATARRH.

THIS DANGEROUS MALADY. THE forerunner of Deafness and Consumption, is so prevalent in this section of Nevada that we feel constrained to give the subject more than a passing notice.

Catarrhis one of the most frequent causes of deafness. Scarcely any one afflicted with this diseas, for any length afflicted with this diseas for any length of time retains a normal acuteness of hearing power. With some, the hearing suffers at first only at times, the ears become o structed during each accession of cold, or s'opped up when blowing the nose; but by degrees these spells of deafness occur oftener and last longer, upun at length the hearing becomes permanatily impaired. In others the haring grows indistinct wit out the appearance of any premonitary symptoms, and the deafness increases steadily until all useful hearing is lost. Noises in the head similar to the escape of steam, the roaring of the ocean, the ringing of bells, the singing of the tea-kettle, and, in fact, all conceivable sounds at times are heard, which add materially to the existing distress. The disease spreads from organ to organ, in adding the throat, gan to organ, in ading the throat, laryex, traches and bronchial tubes, until encroaching further and further, it reaches the finer ramifications of the

it reaches the finer ramifications of the bronchi, when a slight impulse is needed to send it to the lung tissue.

Experience has proven that in a majority of cases, nasd catairh becomes the starting point of consumptive development, the disease being transmitted to the lungs both by a nervous connection and a continuity of surface, and so frequently has this course been noticed that masal catairh is now regarded as a premonition and one of the earliest manifestations of consumption. ion.

By selentific research it has been dis covered that the bornbie disease is caused by a GERM or MICROBE, and

our Germicidal Treatment will posi-tively cure the worst cases.

AFREE TalaL will be given to any who will call at our office.
